DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a polishing sheet, classified in class 428, subclass 304.4.
 - II. Claims 15-20, drawn to a method of manufacturing a polishing sheet by coating and coagulating a polyurethane emulsion, classified in class 427, subclass 246.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case laminating individual layers together to form the multilayered structure.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 1771

- (1) A polishing sheet comprising a surface layer and a polishing layer, as set forth in claims 1-3 and 9.
- (2) A polishing sheet comprising a surface layer, a polishing layer, and an elastic layer, as set forth in claims 4 and 5.
- (3) A polishing sheet comprising a surface layer, a polishing layer, and a supporting layer, as set forth in claim 6.
- (4) A polishing sheet comprising a surface layer, a polishing layer, an elastic layer, and a supporting layer, as set forth in claim 7.
- (5) A polishing sheet comprising a surface layer, a polishing layer, a flexible film, an elastic layer, and a supporting layer, as set forth in claim 8.
- (6) A polishing sheet comprising a polishing layer, as set forth in claims 10, 11 and 14.
- (7) A polishing sheet comprising a polishing layer, and an elastic layer, as set forth in claim 12.
- (8) A polishing sheet comprising a polishing layer, an elastic layer, and a supporting layer, as set forth in claim 13.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic product claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
